WCDMA & HSDPA

FxSecure Key is a state-of-the-art anti-theft device that safeguards your notebook and data against valuable data loss. Using the latest technologies, it provides all rounded data protection, thus avoid leakage of personal, confidential and sensitive data. Designed to fit standard Express Card slot, FxSecure Key is a reliable, yet compact anti-theft device, measuring only 119.6 x 42 x 11.25 mm.

User-friendly Interface

Auto-run mechanism enhances user-friendliness. No hassle of installing software. Simply plugging in the key and everything is up and running!

Data Protection

Supports virtual drive, where files and data can only be seen and accessed with FxSecure Key is plugged into the computer and user properly logged-in.

On-the-fly File Encryption

Enable sending a one-off password to a pre-assigned mobile phone when user tries to access a virtual drive. It will require both FxSecure Key and one-off password to access the virtual drive.

SMS Remote Control

User can remotely control the computer via SMS command to protect privacy and confidential data, e.g., to lock the computer, delete virtual drive and files.

User-defined Security Level

Flexibility to allow user configuring security setting to cater various needs.

Speedy Wireless Connection

Reliable internet connection at the fastest available speed of 7.2 Mbps.
