Product Overview

What is Virtual Storage Workgroup Ultimate?

Virtual Storage Workgroup Ultimate is an online software application that allows you to store, access and share your files using any web-enabled devices. It is specially created for collaboration among project team members and can also be used to backup your files within small and medium business environments.

Virtual Storage embraces Do-It-Yourself concept, you 'purchase' the software and install it on your own server, giving you more control over your files. Having the files in your own server further secures your privacy and enhances security of your sensitive data.

Do I need to pay subscription fee to use Virtual Storage Workgroup Ultimate?

No, you only need to pay a one-off fee to VSC to purchase the software and its yours for life!

What platforms does Virtual Storage Workgroup Ultimate support?

You need either Microsoft Windows XP or Microsoft Windows Server, should you need to install the application on other platforms, please contact VSC for implementation support. The application supports the following browsers; Microsoft Internet Explorer, Mozilla Firefox, Netscape Navigator, Apple Safari, Camino and Opera.

Is there any limit to the storage size?

Practically, no. Having the application on your server(s) basically means the limit of the storage size depends on your server(s). And you can scale your storage infrastructure whenever you need to.

Why You Need it?

- A centralized control for storage and backup repository for all documents and data
- Provides an easier way of sharing huge files internally and externally
- Flexible storage capability and limitless scalability
- Replaces the VPN setup for SMEs
- Robust user security and access right control with multi level grouping
- Cost saving solution on transferring huge files to external parties
